BACKGROUND:

The INVEST Co-op program seeks to improve the economic well-being of small producers in Malawi, Peru, Mongolia and Indonesia. Through an integrated co-operative approach, the program will benefit producers by increasing production and productivity, increasing access to markets, and increasing access to financial services. The program will also focus on building the capacity of local co-operatives and working with governments to create an enabling environment for co-operatives to do business.

The INVEST Co-op Malawi Project seeks to improve the economic wellbeing of 50,000 small producers (Soya, ground nuts, beans, and maize). Through an integrated co-operative approach, the program will benefit producers by increasing production and productivity, increasing access to markets, and increasing access to financial services. CDF Canada is also proposing to partner with local agricultural, finance and insurance co-operative companies to introduce agricultural insurance products to these farmers to help them manage their risks. It is believed that offering insurance through an integrated co-operative model will lower risks, administration costs, and claim processing times.

The project partner in Malawi is the Malawi Union of Savings and Credit Cooperatives (MUSCCO) which is the apex organization for Savings and Credit Co-operatives in Malawi. MUSCCO provides training, liquidity management, representative and advocacy services to its member organizations to improved financial, management and governance capacity.
